

Viewpoint Feedback – Interview Questionnaire:

1. Do you consider the viewpoint and its artifacts to provide any benefits for the design of CIS, in particular for adaptation-related design decisions? Could you describe the benefits?
 - a. Did you find any artifacts or provided information particularly useful for the design of a CIS?

2. What have been your perceived benefits from each of the models and their elements?

3. To what extent are the proposed viewpoint and its artifacts sufficient to describe and handle adaptation in a CIS? Do you think that relevant adaptation-related concerns are not yet addressed?

4. What problems/challenges did you face while performing the given design tasks and extending the models of the adaptation-specific architecture view?
 - a. What actions did you take to tackle these challenges?
 - b. What would you change based on your experiences?

5. Based on your experience now, would you apply the viewpoint again in the future? For which purpose?
